ABSTRACT

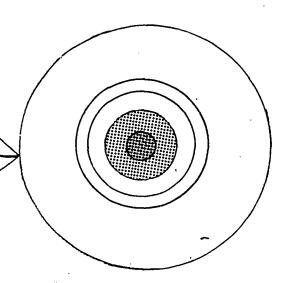

Statistics and forms presented in this circular represent responses to a question asked in an ERS survey of selected school practices. Responses from 468 systems are presented in tabular form by evaluation category (students evaluate teachers; teachers evaluate principals, etc.) and by enrollment level, and indicate that student evaluation of teachers was reported by more school systems than ary other type of client-centered evaluation. In addition to providing updated statistics on the evaluation practices of responding school systems, this report includes a collection of sample forms used in client-centered evaluation. Provided are reproductions of seven forms used in responding school systems for student evaluation of teachers; eight forms for teacher evaluation of principals, assistant principals and/or supervisors; and two forms for principals and other school personnel to use in evaluating the superintendent and the central office staff. A comprehensive bibliography is provided. (Author)

EVALUATING THE EVALUATOR

The question of the advisability and reliability of student evaluations of teachers has received considerable space in professional literature over the years (see bibliography beginning on page 44). Originally, most of these discussions were based on college-level experiences, or rather experiments, to test the relationship between student ratings of teachers and the achievement of students or the correlation between the ratings teachers receive from their superiors and from students.

In recent years, the application of student evaluation of teachers and other types of "client-centered" evaluation (72) \(^1\) on the secondary and even the elementary levels has been receiving increasing attention, especially in light of accelerating demands for accountability in public education. Max S. Marshall, writing in the March 1971 issue of Educational Leadership (35), offers some other reasons for the growing demands by students to evaluate teachers:

By reciprocal justice, for example, if one side grades, so can the other. The two wrongs, however, instead of neutralizing each other, are compounded. The principles and errors are parallel, and consequences are as serious. The student may seek entrance to graduate school; the professor may seek popularity in the right places and promotion.

A second reason for the students' urge to criticize lies in their natural self-assurance. Today, if they consider the first few weeks of a course a bore, the teacher and subject never get a chance.

Youth's resentment of authority is another factor. Intrinsic in this resentment is a significant desire for retaliation. Teachers always please some students and irritate others.

A fourth reason for students' rating their mentors is that they are now urged to do so. To ask an inexperienced student for his opinion is a flattering and appealing diversion, and administrative approval is always welcome.

Fifth, students may rationalize that appraisal is a moral duty. Occasionally a new

idea is effective, of course, but taking criticisms literally, though commonly done, is exceedingly hazardous. However, the relief students feel when they have a chance to speak out may be mildly beneficial.

Teachers have, for the most part, resisted the move toward students evaluating them, while espousing the cause of teacher evaluation of principals and supervisors. A 1971 teacher opinion poll conducted by the NEA Research Division (59) asked respondents, "Do you favor or oppose formal evaluation of classroom teachers by the pupils they teach?" The responses were about equally divided in support and opposition, as is shown by a tabulation of the percentages below:

	Elem.	Sec.	Totals
Strongly favor Tend to favor Tend to oppose Strongly oppose	10.3%	13.8%	12.0%
	39.1	36.8	38.0
	33.1	30.6	31.9
	17.5	18.8	18.1

When administrators in a 1970 Nation's Schools poll (41) were asked a similar question, 40.5 percent responded in the affirmative, 42.5 percent negatively, and 17 percent said they were not sure.

On the other hand, in 1970 a group of teachers responding to the NEA teacher opinion poll (73) were overwhelmingly in favor of teacher evaluation of principals, as the following tabulation shows:

	Elem.	Sec.	Totals
Strongly favor	30.7%	36.5%	33.5%
Tend to favor	40.7	39.4	40.0
Tend to oppose	15.3	13.7	14.5
Strongly oppose	4.7	3.2	4.0
No opinion	8.7	7.2	8.0

What has the body of professional research to say about the evaluation of teachers by students? The following paragraph, although written in 1960, is still valid even after consideration of more recent literature:

There is a growing body of research literature on the use of students' rating of their teachers. This literature probably is more favorable and more consistent than any other in the

 $[\]frac{1}{2}$ Figures in parentheses refer to bibliography eferences on pages 44-47.

area of teacher evaluation. Almost without exception the research reports indicate that pupils can and do make reasonably accurate ratings of teachers. Their ratings tend to agree with each other, and the teachers who are rated best by pupils tend to obtain the highest pupil gains. Pupil ratings often do not agree with ratings by principals, supervisors, or other teachers. (This has not been considered an indication of weakness, however, since ratings by superiors and peers have not been shown to agree with pupil gains measures, or to be satisfactory in other ways.) Teachers have indicated their belief that pupil ratings, as obtained in research studies, were both fair and accurate. (26:33)

An article in a recent issue of the National Elementary Principal (47) conjectures as to why student evaluations of teachers are more valid and useful than other teacher ratings:

There are advantages to student evaluation. First, students have had the opportunity to observe continually what they are rating. Second, a large number of individual biases can be averaged, which is not possible when one administrator evaluates a teacher. Third, students seem to take good teaching seriously. A questionnaire answered by 1,603 high school juniors and seniors in 1970 rated highest those teachers who were demanding and cared about students as fellow human beings. . . The disadvantages of evaluation by students are obscure.

Of course, client-centered evaluation has other aspects than student evaluation of teachers. Logically, it also includes teachers evaluating principals, assistant principals, and supervisors; principals evaluating the central office administrators (including the superintendent); and even parents evaluating principals and central office staff. There is little that can be said about these other aspects of clientcentered evaluation because they have not received as much attention for as long as has student evaluation of teachers. In searching professional literature on the subject, only four articles relating to the evaluation of principals by teachers were found (bibliography items 70, 71, 72, and 74), excluding the previouslycited NEA teacher opinion poll question.

If professional literature does not reflect a lively interest in all aspects of client-centered evaluation, the number of requests to the Educational Research Service for its now out-of-print Circular No. 5, 1970, The Evaluatee

Evaluates the Evaluator (19), certainly attests to a continuing investigation of its possibilities. Rather than reprint the 1970 study, ERS has gathered some recent statistics and assembled a new collection of sample forms to produce this updated report on client-centered evaluation.

The statistics and forms presented in this Circular are the results of responses to a question in ERS's 1973 survey of "Selected School Practices." The survey questionnaire, which was sent to all school systems enrolling 12,000 or more pupils and to a selected group of suburban school systems enrolling less than 12,000 pupils, yielded the following usable replies in each enrollment group:

		Enroliment strata	Ques. sent	Replies received
1	-	100,000 or more	27	18(66.6%)
2	-	50,000 to 99,999	53	45(84.9%)
3	-	25,000 to 49,999	106	72(67.9%)
4	-	12,000 to 24,999	399	221(55.4%)
		Smaller systems	201	112(55.7%)
		Totals	786	468(59.5%)

The 468 responses are tabulated in Table A, on page 3. As can be seen in that table, student evaluation of teachers was reported by more school systems than any other type of client-centered evaluation.

It should be noted, however, that only two school systems reported that this is a system-wide practice. However, ERS received more forms for teacher evaluation of principals than for student evaluation of teachers.

As to the disposition of completed forms, it is not possible to say whether the client-centered evaluations have any bearing on the formal evaluation of an individual by his superior since the question was not asked. It is assumed that the majority do not go beyond the person evaluated since many include statements to that effect. One exception to this is the procedure for evaluating principals as reported by Cupertino Elementary School District, California. As part of a principal's formal evaluation according to predetermined performance objectives, the evaluator has the teachers in the principal's school complete the Purdue Teacher Opinionaire (see explanation

of the PTO on page 47), and he reviews the results with the principal to aid him in setting his performance goals for the next evaluation period. Also, a random sampling of Cupertino parents are asked to complete a district—made "Inventory of Parent Opinion." The objective of this part of the evaluation is to test the home—school relations of the principal's school. This questionnaire is reproduced on pages 35-38.

Beginning on page 5 are reproductions of seven forms used in responding school systems for student evaluation of teachers; eight forms for teacher evaluation of principals, assistant principals, and/or supervisors; and two forms for principals and other school personnel to use in evaluating the superintendent and central office staff. It should be noted that these forms were selected from among the many submitted to illustrate the variety now in use. They were screened to avoid duplication with the forms reproduced in ERS Circular No. 5,

1970, and to exclude any of the standardized forms available from universities or individuals (see pages 47 and 48) and any forms which are also used for evaluation by an individual's superior.

It is strongly suggested that those using this study to help develop forms for client-centered evaluation DO NOT reproduce the forms included herein. Rather, these are presented as suggestions, to stimulate thinking. Many additional suggestions for items to be included on client-centered evaluation forms can be found in the bibliography (pages 44-47), and in the following Circulars which are still available from ERS at the prices indicated:

This Teacher Evaluation form was prepared by some members of the Student Council after discussion with the entire Student Council, Administration, and Teachers who attended the Student-Faculty meetings. At a Student-Faculty meeting some of the teachers suggested that this be made available to the teachers at each of the quarter grading periods so that at this time both the teacher and the student could be made aware of areas that need improvement.

The use of this questionnaire is, of course, optional and its intent is to help the teacher determine areas of weakness. Any comments as to how this questionnaire could be improved would be most welcome.

If you would like to have copies of this questionnaire to give to your students, please fill out the form at the bottom and place it in the principal's mailbox this week.

CHULA VISTA ELEMENTARY SCHOOL DISTRICT, CALIFORNIA An Evaluation of Your Principal

In a school organized on the basis of democratic control, where the members of the faculty acting as a group develop the important policies and programs of the school, it is particularly important that the principal be made cognizant of desires of the individual members of the group so that he may function more effectively. It is important that he gain some notion of how well he is functioning in this capacity.

After each statement appear the numbers 1, 2, 3, 4, 5. Each statement is a positive one. You are asked to place a circle around the number which best represents your opinion according to the following scale:

- 1. Your response is in complete agreement with the statement.
- 2. You generally agree with the statement, but have some reservations.
- 3. You are undecided. You can think of arguments for and against the statement.
- 4. You tend to disagree, but feel that something might be said in the affirmative.
- 5. You wholeheartedly disagree without reservation.

DO NOT SIGN YOUR NAME. Your entire cooperation and frankness are earnestly solicited. Only by such action will this technique have real value. The answers and summarization will be presented and discussed in a subsequent teachers' meeting.

CUPERTINO UNION SCHOOL DISTRICT Cupertino, California

CUPERTINO INVENTORY OF PARENT OPINION

DIRECTIONS

DO NOT PUT YOUR NAME ON THIS PAPER!

"How do you feel about the elementary school your children attend?" That is what we are asking you to tell us by filling out this inventory. We are surveying parents of all of the schools in the Cupertino School District as part of our continuing effort to improve the educational program for your children.

It doesn't take very much time; you can answer it nearly as fast as you can read it. In most cases you merely check the answer that tells how you feel.

We are asking a random sampling of parents to complete this inventory. To assure that the reactions of parents are spread evenly throughout the school, it is necessary that each parent think in terms of only one child for purposes of this questionnaire. Therefore, if you have two or more children in the school please answer the questions in terms of the one who is oldest. Answer ONLY for this ONE OLDEST CHILD.

Do not put your name on this paper. By making it impossible to know who says what, most people are more likely to say what they really think. Please answer every question, and mail the completed inventory as soon as possible. A stamped return envelope is enclosed for your convenience.

COMMERCIALLY AVAILABLE CLIENT-CENTERED EVALUATION FORMS

Principal's Behavior Questionnaire

Developed by the Stanford Center for Research and Development in Teaching (Stanford University, Palo Alto, California), this questionnaire consists of 12 statements, each describing an element of a principal's professional behavior. For each of these items, the teacher is asked first to indicate on a 10-point scale the degree to which, in his opinion, the statement applies to the behavior of an ideal principal. Second, the teacher is asked to indicate on the same scale the degree to which the statement applies to the behavior of his own principal. From the responses, the Center compiles 12 separate graphs, each showing the average response characterizing the ideal principal and, on the same graph, the average response of the principal's teachers regarding the degree to which his own behavior meets the descriptive statement. The 10-point scale ranges from "not at all like" to "extremely like." The graphs are sent from the center directly to the principal.

Purdue Teacher Opinionaire

The Purdue Teacher Opinionaire is designed to assess the effect of teacher-principal rapport on general school effectiveness. The form contains 20 statements which might be made about the principal of any school. The teacher is asked to indicate whether he agrees, probably agrees, probably disagrees, or disagrees with the statement as it applies to his principal. The completed forms are scored by the school district, and profiles are developed on each of 10 factors measured by the Opinionaire, including teacher response to the principal.

Diagnostic Teacher-Rating Scale

This form, developed by Sister Mary Amatora, O.S.F., is suitable for students as low as grade 4. It is available from Educators-Employers Test and Services Associates, 120 Detzel Place, Cincinnati, Ohio 45219, at \$3.15 for a kit of 35 questionnaires. A specimen set is 50¢.

Illinois Ratings of Teacher Effectiveness

Suitable only for secondary school pupils, this form was developed by B. Everard Blanchard and is available from Western Psychological Services, 12031 Wilshire Boulevard, Los Angeles, California 90025. The price is \$7.50 for 25 rating forms, an instructional manual, and the scoring key.

A Student's Rating Scale of an Instructor

This form was developed by Dr. Russell M. Eidsmoe for use by secondary school pupils and is available from Dr. Eidsmoe at Morningside College, 4404 Morningside Avenue, Sioux City, Iowa 51106, at \$+.50 for 100 copies (minimum order).

Teacher Image Ouestionnaire

At the request of a teacher or principal, the Educator Feedback Center of Western Michigan University at Kalamazoo provides a Teacher Image Questionnaire to be administered to one or more of a teacher's classes, at a fixed price per class. The questionnaire form is designed to help teachers learn how students feel about and perceive significant characteristics of a teacher. Designed to be administered to grades 7-12, the questionnaire measures reactions varying from poor to excellent in 16 areas including knowledge of the subject, fairness, control, attitude toward students, variety in teaching procedures, encouragement of student participation, and sense of humor.

As soon as the questionnaires have been completed, they are shipped hack to the Center for analysis. After analysis, an image profile is developed and sent to the teacher. In addition to the Teacher Image Profile, the Center compiles a listing of factors which might be causing problems indicated by the profile and suggestions for possible behavioral changes designed to improve teaching effectiveness. These are potential causes and solutions based on exhaustive reviews of behavioral science research from which the teacher may make selections based on his familiarity with the situation. All feedback is confidential and goes only to the person on whom it was obtained, unless that person requests otherwise.

Upon request, the Center will also prepare "superimposed" image profiles which show graphically the discrepancies between a teacher's self-image, his real image, and his ideal image; how students in different classes perceive the same teacher; and how much perceived effectiveness is altered over a period of time.

Similar services are available for administrators, counselors, and college instructors.

Questa I and Questa II

These forms were designed by the Educational Testing Service for simultaneous administration across the country. Questa I is administered to secondary school pupils when entering high school, and Questa II is administered about one semester later. Information can be obtained from ETS by writing to the Program Director, School Research Program, Educational Testing Service, Box 2601, Princeton, New Jersey 08540. Costs, which include scoring, are as follows: for Questa I, \$1.25 per form (minimum of 40), \$4 for interpretive manual, and \$2 for normative data; for Questa II, \$1.40 per form (minimum of 40), \$3 for interpretive manual, and \$3 for normative data.

The EDUCATIONAL RESEARCH SERVICE, which operated for nearly 50 years under the sponsorship of the American Association of School Administrators with the cooperation of the Research Division of the National Education Association, was discontinued as of August 31, 1973. September 1, 1973, the new Educational Research Service, Incorporated, began operation under the joint sponsorship of the American Association of School Administrators, the National Association of Elementary School Principals, the National Association of Secondary School Principals, and the National School Public Relations Association. ERS, Inc., operates on a completely nonprofit and independent basis and offers services specifically designed to meet the special needs of school administrators represented by these four organizations. It provides essentially the same services as the former ERS, but services are greatly expanded.

Subscription fees to the new service are accepted on an annual basis, with the subscription year beginning September 1. Membership is open to local school districts, intermediate school districts, state departments of education, state and local associations of school administrators, and university departments of education. Subscriptions for other groups may be accepted by special action of the ERS Board of Directors. The schedule of fees is graduated on the basis of school system size and number of administrators Inquiries regarding subscripserved. tions to the new service, and requests for all ERS publications, should be addressed to:
